

Figure 1 Perfect Foresight Relation of GIC , $FHWC$, RIC , and $PF-FVAC$

An arrowhead points to the larger of the two quantities being compared. For example, the diagonal arrow indicates that $\mathbf{D} < R^{1/\rho}\Gamma^{1-1/\rho}$, which is one way of writing the $PF-FVAC$, equation (23)

Figure 4 Example Solution under $\{\text{FVAC}, \text{GIC-Nrm}\}$
